

Julian Rosero

Software Developer

+1 (236) 990-2068 | Vancouver, BC | julian.rosero@outlook.es | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Software Developer with 3+ years of professional experience building production-ready systems across game development, web, and mobile platforms. Proven ability to implement real-time data pipelines, persistent backends, and scalable architectures using C#, .NET, JavaScript and Python. Background in shipping commercial products within Agile teams, from hardware integrations to full-stack web and mobile applications.

EXPERIENCE

2025-2026	Vancouver Film School <i>Web Application Project</i> Developed a full-stack scoreboard platform with user authentication via Firebase, dual database architecture using MySQL for structured data and MongoDB for flexible content storage, and a Python-based telemetry API tracking user behavior in real time.
2025-2026	Vancouver Film School <i>Mobile Application Project</i> Built a React Native mobile news platform with user authentication, live data synchronization, and a structured backend data layer using Expo Snack.
2023-2024	Universidad Pontificia Bolivariana / Hynmers <i>Junior Software Developer</i> Developed a real-time hardware communication pipeline integrating Arduino-based potentiometers with Unreal Engine 5, enabling live motion data to drive interactive rehabilitation sessions. Implemented user authentication via Firebase and a MongoDB database layer to persist operator and patient session data across interactions.
2025	Teravision Games <i>UEFN UI Programmer</i> Contributed to the launch of Raptor Heist, a Fortnite island reaching 5600 concurrent players at peak. Implemented a real-time in-game economy system with reactive state management, edge-case validation and persistent upgrade tracking. Supported LiveOps post-launch within a Scrum-based pipeline.
2024-2025	Yuyana Studios / Hadron Games <i>Mid Software Developer</i> Solely developed Nutriaventuras, a complete mobile application commissioned for a government educational program deployed to students across Peru. Implemented a manual JSON serialization system for persistent player data and built a statistics export pipeline for educators. Contributed to Hadron Games delivering 20+ minigames under tight production timelines.

EDUCATION

2025-2026	Vancouver Film School Programming for Games, Web and Mobile
2019-2023	Universidad Pontificia Bolivariana Digital Entertainment Design Engineering

SKILLS

Languages	C# (Mid), JavaScript/TypeScript (Junior), Python (Junior), C++ (Junior)
Frameworks	React, React Native, Node.js, .NET
Databases	Firebase, MongoDB, MySQL
Engines & Tools	Unity, Unreal Engine 5, UEFN
Pipeline	Git (CLI), Perforce, Jira, Agile/Scrum

SHIPPED TITLES

Raptor Heist	Teravision Games, UEFN (2025)
Nutriaventuras	Yuyana Studios, Unity Mobile (2025)
Hynmers VR Therapy System	Universidad Pontificia Bolivariana, Unreal Engine 5 (2023-2024)

LANGUAGES

English	C1 - Advanced Listening, Reading, Speaking and Writing
Spanish	Native language
